The foundation sees itself as a long-term institution for health-oriented societal development, grounded in responsibility, cultural understanding, and a commitment to creating sustainable impulses for future generations.

Status: 23 September 2026

BALAJI TAMBE
 Life in Balance Academy

INVITATION

to participate in a sustainable
 health and education initiative

Origins

The **Balaji Tambe LiBA Foundation gGmbH** was established to preserve, further develop and effectively carry forward the life's work of **Shreeguru Dr Balaji Tambe**, an internationally recognised Ayurvedic pioneer, author and Padma Shri award winner, for the long term.

The Foundation sees itself as a modern, non-profit institution at the intersection of:

- holistic health promotion,
- evidence-based prevention,
- education,
- culture,
- international knowledge transfer
- and sustainable social development.

In doing so, it combines traditional Indian health sciences with contemporary European approaches to health, quality of life and prevention.

(Padma Shri: one of India's highest civilian honours)

Vision

We believe that the future of sustainable health lies in an intelligent interplay of:

- prevention,
- education,
- science,
- cultural competence,
- and human balance.

The foundation aims to foster long-term societal structures that view health not merely as the treatment of illness, but as the conscious **development of quality of life, resilience, and inner stability.**

Planned Fields of Impact & Measures

Health & Prevention

Promotion of integrative health approaches with a focus on prevention, Ayurveda, mental well-being, and sustainable lifestyles.

Education & Knowledge Transfer

Development and support of educational, research, and awareness-building projects in both national and international contexts.

Culture & Awareness Building

Support of cultural projects, music therapy, and intercultural understanding as contributions to societal balance.

International Cooperation

Building long-term partnerships between institutions, research, healthcare, and educational initiatives in Europe and India.

Why is this commitment socially relevant?

Global trends are increasingly highlighting the importance of preventive and inclusive healthcare models:

- rising levels of mental health strain,
- demographic change,
- rising healthcare costs,
- growing interest in prevention,
- the need for holistic health education,
- the search for sustainable social solutions.

The Foundation deliberately positions itself as a long-term, values-based initiative in a rapidly growing sector of the future.

Opportunities for Funding & Partnerships

The Foundation offers committed individuals, companies and institutions the opportunity to combine social responsibility with a lasting impact.

Funding opportunities
